

PRESS RELEASE

March 2010

Environmental friendly STEYR **MOTORS** engines capture inland waterways

Thousands of kilometers of inland waterways can be explored with environmental-friendly and reliable diesel-engines of STEYR MOTORS.

STEYR MOTORS is well known for engines with a high load capacity, high reliability, high comfort and extremely environmental-friendly configurations.

These engines work successfully on seas all over the world for work and rescue boats, as well as for pleasure boats.

STEYR MOTORS is a trustworthy supplier of system-components for the marine sector and offers a product range of diesel-engines from 54 HP to 306 HP, diesel-electric propulsions and HYBRID-options.

The Dutch LINSSEN Yachts thrives at inland waters with environmental-friendly diesel-engines of STEYR MOTORS.

LINSSEN Yachts offer a wide range of steel-displacement-boats, which are also suitable for charter-business. A relaxable vacation on inland waters is a synonym for travelling LINSSEN Yachts. These charter-boats are floating smoothly through inland waters. They are well known by cruisers for maximum comfort, usability and reliability. (available in Germany and France)

The beating heart of such a special LINSSEN boat is reliable, robust but also silent and powerful propulsion – an engine of STEYR MOTORS.

The advantages to join STEYR MOTORS and the partners are very clear to see:

1. STEYR MOTORS knows about the importance of a solid, healthy environment. Competence, experience and efficiency are keywords for the team for permanent improvement of our products.
2. Reliability is a must for STEYR MOTORS for existing solutions as well as for new ones. Two examples for our strategy of permanent improvement are the HYBRID-propulsion-system and the diesel-electric propulsion-solution.
3. Worldwide distributor networks of STEYR MOTORS and our partners
