

SEA JAPAN

April 2010

MIZUNO exhibited STEYR Solas engine at SEA JAPAN

Sea Japan 2010 review

Sea Japan is the only international maritime industry tradeshow and conference held in Japan. The Sea Japan exhibition brings together buyers and sellers of marine equipment, shipbuilding technology and products and services for the shipping industry from Japan and around the world.

Mizuno Marine, STEYR MOTORS' general distributor for Japan, exhibited STEYR engine last week and had about 18,000 visitors for this event.

They continued to promote sales of BUKH-STEYR engines to Japanese lifeboat makers.

With great success they managed special agreements with big lifeboat builders for Freefall Lifeboat systems.
