

## Re-Power Pack in Action

Experience the Pinzgauer and Puch G from scratch in Hellsklamm

---

Steyr, June 13, 2017

**In cooperation with S-TEC STEYR MOTORS arranged a unique event on May 13<sup>th</sup>, 2017 to give off-road fans the opportunity to gather first-hand experience with the Re-Power Pack for the legendary Pinzgauer and Puch G at Hellsklamm.**

For the first time off-road enthusiasts and adventurers had the chance to examine and test-drive the brand-new Re-Power Pack for Pinzgauer and Puch G. Hellsklamm, a 10 hectare big trial zone was chosen by S-TEC and STEYR MOTORS as stage for the lively demonstration of this extraordinary combination of innovation and legend. Besides gathering first-hand experience, guests of the event received detailed information on the Re-Power Pack from S-TEC's and STEYR MOTORS' experts on site.

Merged with a completely new drivetrain based on the cutting-edge M14 Common Rail diesel engine, neither ditches nor mud pools could stop the upgraded test vehicles. For each vehicle a tailored package of selected components for transmission, cooling and switch was developed by S-TEC and STEYR MOTORS. The lightweight Monoblockdesign and state-of-the-art common rail technology of the STEYR M14 CR ensure higher efficiency, enhanced performance and increased durability.

In autumn 2017 the Re-Power Pack for Pinzgauer and Puch G will be available for all who want to give their off-road legends new strength and power.
