

STEYR MOTORS office in Graz

Additional capacities are established for the engineering team

Steyr, June 9, 2017

Increasing order numbers and innovative projects – STEYR MOTORS increases constantly its capacities in the field of engineering. To continue the expansion of the engineering team, the company starts looking for employees actively in the area of Graz – applicants for designated job positions can choose freely between working in Steyr and Graz.

STEYR MOTORS is an internationally renowned engineering specialist. High quality products, innovative spirit, R&D competences in the field of combustion engines as well as for hybrid systems and e-machines make the company a highly attractive partner for progressive and sustainable solutions for marine, vehicle and industrial applications. Besides numerous customer requests STEYR MOTORS pursues projects on new propulsion concepts and technologies on its own initiative as well as in cooperation with R&D partners. Considering future projects and increasing order numbers, the company constantly hires new employees.

Since the foundation 2001 through a management-buyout the STEYR MOTORS Team continually grew from 35 to 200 employees in 2017. After a significant expansion of the premises in Steyr 2015, the company is about to reach the next milestone – the establishment of a subsidiary in Graz. To continue STEYR MOTORS' success story, the company looks for ambitious and technologically-minded employees for its engineering team in Graz. First job offers are already available online. Applicants for designated job positions can choose freely between the office Steyr and Graz. STEYR MOTORS is looking forward to welcoming new colleagues in the team, who are eager to shape the future of mobility together.
